PLATINUM SPONSOR

About Shenzhen Sciencare Medical Industries Co Ltd

Sciencare Medical has always been committed to the research and development, production and marketing of innovative drugs. Engage with the world's top scientific leaders and doctors, our goal is to further exploring medical research. In 2003, Sciencare began to develop naltrexone implants.

With decades of continuous research, Sciencare has accumulated rich experience in long-acting sustained-release technology, and has made contributions to the field of Substance Abuse and Mental Illness. And become technology leader in the field of Sustained-release and Naltrexone application.

About Sciencare Naltrexone Implants

Sciencare Naltrexone implant is a long-acting sustained-release dosage form that can be implanted into subcutaneous tissue. This innovated implant dosage was developed by Sciencare. After being implanted into subcutaneous tissue, the naltrexone implant takes effect quickly and can be slowly and stably released in vivo for up to **150 days**. The sustained release characteristics of the implanted dosage form effectively prevent the risk of relapse caused by the patient's voluntary withdrawal of the drug.

EDT Timings	Local Timings	
08:00-08:10		Introduction and Opening Ceremony

Moderator: Traci A Owens, Attorney at Law, USA

Keynote Presentations

08:10-08:50	08:10-08:50	Title: Clinical pharmacology of marijuana Frederick J. Goldstein , Philadelphia College of Osteopathic Medicine, USA
08:50-09:30	20:50-21:30	Title: A randomized, double-blind clinical trial of the efficacy and safety of opioid challenge evaluation of blockade by naltrexone implant Hao Wei , The Second Xiangya Hospital of Central South University, China
09:30-10:10	09:30-10:10	Title: Is Addiction treatment effective? Compared to what? How would we know? Deni Carise , University of Pennsylvania, USA

Chair: Frederick J. Goldstein, Philadelphia College of Osteopathic Medicine, USA

Oral Presentations

10:10-10:30	10:10-10:30	Title: Substance Use Disorders: Scope of the problem, What to Look for in a Treatment Program Deni Carise , University of Pennsylvania, USA
10:30-10:50	22:30-22:50	Title: TRPV1 responses in the cerebellum using electro acupuncture treatment for chronic pain and depression co-morbidity in a murine model Bernice Lottering , China Medical University, Taiwan
